

Manage Persistent Memory	117
Change Memory Hot Add Settings	122
Virtual Disk Configuration	123
About Virtual Disk Provisioning Policies	123
Large Capacity Virtual Disk Conditions and Limitations	124
Change the Virtual Disk Configuration	125
Use Disk Shares to Prioritize Virtual Machines	127
Determine the Virtual Disk Format and Convert a Virtual Disk from Thin Provision to a Thick Provision Format	127
How do I Add a Hard Disk to a Virtual Machine	128
SCSI, SATA, and NVMe Storage Controller Conditions, Limitations, and Compatibility	135
Add a SATA Controller	137
Add a SCSI Controller to a Virtual Machine	138
How to Activate and Deactivate the Automatic Replacement of the LSI SAS Controller	139
Add a Paravirtualized SCSI Adapter	140
Add an NVMe Controller	141
Change the SCSI Controller Configuration	142
Virtual Machine Network Configuration	143
Network Adapter Basics	143
Network Adapters and Legacy Virtual Machines	145
Change the Virtual Machine Network Adapter Configuration	145
How to Add a Network Interface Controller to a Virtual Machine	147
Virtual Machine Parallel and Serial Port Configuration	149
Other Virtual Machine Device Configuration	156
Change the CD/DVD Drive Configuration	156
How do I Add or Modify a Virtual Machine CD or DVD Drive	160 How do I
Add a PCI Device to a Virtual Machine	162
How do I Configure 3D Graphics	167
How do I Add a Virtual Watchdog Timer Device to a Virtual Machine	170
How do I Add a Precision Clock Device to a Virtual Machine	171
Securing Virtual Machines with Intel Software Guard Extensions	172
Enable vSGX on a Virtual Machine	173
Remove vSGX from a Virtual Machine	175
USB Configuration from an ESXi Host to a Virtual Machine	176 How the
USB Autoconnect Feature Works	178 vSphere Features Available
with USB Passthrough	178
Conditions and Limitations When Configuring USB Devices for vMotion	179
Avoiding Data Loss with USB Devices	180 Connecting
USB Devices to an ESXi Host	180
Add USB Devices to an ESXi Host	181

Add a USB Controller to a Virtual Machine	182
Add USB Devices from an ESXi Host to a Virtual Machine	183
Remove USB Devices That Are Connected Through an ESXi Host	184
Remove USB Devices from an ESXi Host	185
USB Configuration from a Client Computer to a Virtual Machine	185
How to Connect USB Devices to a Client Computer	187
Add USB Devices from a Client Computer to a Virtual Machine	188
Remove USB Devices That Are Connected Through a Client Computer	189
Remove a USB Controller from a Virtual Machine	190
Add a Shared Smart Card Reader to Virtual Machines	190
Securing Virtual Machines with Virtual Trusted Platform Module	191
What Is a Virtual Trusted Platform Module	192
Create a Virtual Machine with a Virtual Trusted Platform Module	193
Add Virtual Trusted Platform Module to an Existing Virtual Machine	195
Remove Virtual Trusted Platform Module from a Virtual Machine	196
Identify Virtual Trusted Platform Module Enabled Virtual Machines	196
Securing Virtual Machines with AMD Secure Encrypted Virtualization-Encrypted State	197
vSphere and AMD Secure Encrypted Virtualization-Encrypted State	197
Add AMD Secure Encrypted Virtualization-Encrypted State to a Virtual Machine Using the vSphere Client	198
Activate AMD Secure Encrypted Virtualization-Encrypted State on an Existing Virtual Machine Using the vSphere Client	199
Add AMD Secure Encrypted Virtualization-Encrypted State to a Virtual Machine Using the Command Line	200
Activate AMD Secure Encrypted Virtualization-Encrypted State on an Existing Virtual Machine Using the Command Line	202
Deactivate AMD Secure Encrypted Virtualization-Encrypted State on a Virtual Machine Using the vSphere Client	203
Deactivate AMD Secure Encrypted Virtualization-Encrypted State on a Virtual Machine Using the Command Line	203

6 Configuring Virtual Machine Options 205

General Virtual Machine Options	206
Change the Virtual Machine Name	206
View the Virtual Machine Configuration and Working File Location	207
Change the Configured Guest Operating System	207
VMware Remote Console Options	208
Change the Virtual Machine Console Options for Remote Users	208
Configure Virtual Machine Encryption Options	209
Encrypt an Existing Virtual Machine or Virtual Disk	209
Decrypt an Encrypted Virtual Machine or Virtual Disk	210
Clone an Encrypted Virtual Machine	211

Virtual Machine Power Management Options	213	
Manage Power Management Settings for a Virtual Machine	213	
Configuring VMware Tools Options	214	
Configure the Virtual Machine Power States	214	
Synchronize the Time of a Virtual Machine Guest Operating System with the Host		216
Virtualization Based Security	217	
Activate Virtualization-based Security on an Existing Virtual Machine		217
Activate Virtualization-based Security on the Guest Operating System		219
Deactivate Virtualization-based Security	219	
Identify VBS-Enabled Virtual Machines	220	
Configure Virtual Machine Boot Options	220	
Activate or Deactivate UEFI Secure Boot for a Virtual Machine	220	Delay the Boot Sequence
Sequence	222	
Configuring Virtual Machine Advanced Options	222	
Enable Virtual Machine Logging	222	
Configure Virtual Machine Debugging and Statistics		223
Change the Swap File Location	223	
Configure the Virtual Machine Latency Sensitivity		224
Set a Stun Time Limit for vGPU Virtual Machines		225
Configure Fibre Channel NPIV Settings	227	
Configure the CPU Topology of a Virtual Machine	228	
7 Configure Virtual Machine Advanced File Parameters	231	
8 Managing Multi-Tiered Applications with vSphere vApp	232	
Create a vApp	233	
Perform vApp Power Operations	234	
Create or Add an Object to a vApp	235	
Clone a vApp	236	
Edit vApp Notes	236	
Configure vApp Properties	237	
Edit vApp Settings	238	
Configure vApp CPU and Memory Resources	238	
Configure vApp IP Allocation Policy	239	
Configure vApp Startup and Shutdown Options	241	
Configure vApp Product Properties	241	
View vApp License Agreements	242	
Add a Network Protocol Profile	242	
Assign a Port Group or Network to a Network Protocol Profile	245	
Use a Network Protocol Profile to Allocate IP Addresses to a Virtual Machine or vApp		246
